

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

The *Catalog* is subdivided into parts corresponding to the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, the symbols used with the registration numbers to identify the classes, and the prices of the semiannual or annual issues.

The record of each copyright registration listed in the *Catalog* includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant as given in the application for registration, the copyright date, the copyright registration number, etc.).

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Information as to changes of copyright ownership is not included in the *Catalog*, but a search of the Copyright Office Assignments and Related Documents Indexes may be requested from the Register of Copyrights. A fee for the search and report will be estimated at the statutory rate of $5 per hour.

For each registration listed, except for renewals, there has been deposited a copy or copies of the work in accordance with the provisions contained in sections 12, 13, 14, or 215 of Title 17 of the *United States Code*.

Orders, payable in advance, *Catalog of Copyright Entries* shou Superintendent of Documents, Printing Office, Washington, D may be placed for individual i tions for one or more parts, or *Catalog* at $50 a year, for per or three years. Introduction

PART 1 lists works registered in class A and contributions to periodicals registered in class B under the symbol BB. Works for which the copyright has been renewed are listed separately in the Renewal Registrations section.

The works listed include not only the current output of the book publishing industry of the United States and many works in English and in foreign languages published abroad, but also the products of many specialized publishing enterprises. Thus, in addition to novels, biographies, poems, books on history, religion, etc., and other works of general interest there are included business reports and yearbooks, trade catalogs and directories, manuals, instruction books, business and legal services, research studies in many fields, and, in some instances, printed matter attached to or accompanying games, filmstrips, and other articles.

Each work is described in a main entry which includes information pertinent to the copyright claim. Arrangement of entries is alphabetical under the name of the author (i.e., the person or organization principally responsible for the content of the work) or, in the case of some serials and certain other works, under the title. Ref the main entries from the nan authors (e.g., joint authors, edit
